ENGINEERED TREAD PATTERNS

Patented 3S internal metal core

- Prevents detracking
- Minimizes vibrations
- Improves ride quality

Curbshield technology with reinforced carcass edge

- Fortifies carcass protection
- Impedes catastrophic edge cuts
- Reduces internal components wear exposure

Self cleaning tread design

- Promotes lug-void cleanout for maximum traction
- More traction in reverse driving

Enhanced high-tensile, rubber-sealed steel cables

- Cable corrosion protection
- Strengthens carcass

Premium rubber compound and extra thick carcass

- Impact and damage resistance
- Extends service life

Optimized sprocket holes

- Reduces peak load on track and undercarriage parts; allows for sand and debris to pass through with ease

ENGINEERED TREAD PATTERNS

1 Single-cure technology

- Resists catastrophic failure
- Increases durability
- Improves aesthetic appearance

2 Forged metal cores with Trackguard technology

- Improves rolling path life
- Reduces internal component failures

3 Endless high-tensile, rubber-sealed steel cables

- Eliminates joint failures
- Improves cable breakage resistance
- Maximizes and strengthens carcass durability

4 Optimized tread profiles

- Provides excellent traction in any track application
- Provides low rolling resistance hence low energy consumption

5 Self cleaning tread design

- Promotes lug-void cleanout for maximum traction
- Improves productivity and help lower running costs

 AT AFTERMARKET PRICES**

COMPACT TRACK
 LOADERS

- 1 Enhanced hardening with deeper penetration**
 Provides longer sprocket wear
- 2 Premium quality design and engineering**
 Meets the toughest OEM specifications
- 3 Optimized geometry and design**
 Ensures best fitment with tracks for longer track life

MULTI-TERRAIN LOADER TRACKS
ENHANCED DURABILITY AND PROTECTION

MULTI TERRAIN
 LOADERS

- 1 Single-cure technology with superior internal casing structure**
 Designed to provide maximum drive lug bonding and utilisation life.
- 2 Heavy duty carcass construction**
 Increases lateral stability to eliminate detracking for more uptime
- 3 Versatile tread pattern matched with advanced rubber compound**
 Maintains good traction throughout tread life

CAMSO RUBBER OTT

1 Full rubber track reinforced with steel core and cables

Allows smoother operation on asphalt, concrete and turf surfaces without damage or marking

2 Wide continuous rubber track footprint

Increases flotation by 5 times compared to tyres alone, and at least twice as much as standard steel tracks

3 Embedded forged metal core with engineered wing design

Ensures strength and rigidity to avoid detracking

4 Internal traction rib

Provides high traction between tyre and track and prevents tyre wear

CAMSO STEEL OTT

1 Case-hardened all-steel track construction

Maximizes durability and performance in severe applications

2 Customizable sizing with variable pitch design

Facilitates easy product selection and installation

3 Engineered high-traction tread bar

Provides enhanced all-around traction especially on open side slopes and unprecedented traction on ice

4 Wide-void design

Enhances debris and rock cleanout providing optimum traction on soft surfaces

THE CAMSO DIFFERENCE

At Camso we achieved an edge on our competition by differentiating ourselves in three specific ways:

1 CAMSO is a leading manufacturer of OEM brands

Camso is a proud supplier of the world's best known construction brands. We have achieved our OEM positions through close collaboration, co-development, and validation with leading equipment manufacturers. Working with the OEM's has pushed our products to new levels of toughness and represents a symbol of quality and performance end-users can trust.

Many Camso products are also offered through various OEM aftermarket programs.

2 CAMSO offers the best warranty on the market

Actions speak louder than words. This is why we improved our terms and back all of our tracks with an industry leading non-prorated warranty on material and workmanship.
