WHY A NEW TRACK?

For a number of reasons...Has your sled lost the edge it had when you first bought it? Are you looking to do more with your stock machine? Because a replacement track can push your journey to new levels of performance. Why shell out big bucks for a new sled or risk voiding your warranty with performance-enhancing engine modifications? Camso tracks are an effective and affordable way to extend the life of your sled.

Feel the difference

Camso track will go beyond limits.

- Better traction on any surface
- Better handling and stability
- Quicker acceleration
- Shorter stopping distances on hard surfaces
- Better flotation in soft, deep snow

WHATEVER YOUR STYLE IS, **CAMSO HAS THE RIGHT TRACK**

It doesn't matter if you're a recreational rider or a racer, whether you prefer groomed trails or backcountry exploration, whether you seek the adrenaline rush of steep terrain or the comfort of a casual cruise in the countryside. As riders, we share one thing: our passion for snow. We love it. We pray for it. We live the journey.

To get the maximum excitement out of your sled in the conditions you prefer, select the best track for the type of rider you are.

TRAIL

You're someone who loves well-defined routes, a cruiser doing big mileage, an aggressive rider with a thrill of top-notch traction, or a power rider flooring it on the straightaways.

- Groomed snowmobile trails
- Ungroomed trails used enough to be compacted most or all of the time
- Bare or lightly covered ice with special traction challenges

CROSS-COUNTRY

You prefer deeper, looser snow. Racking up the miles in the backcountry? Check. Half on-trail. half off? Check.

- Ditch lines
- ungroomed trails
- with no trails

UTILITY

You're working in the snow. You have a job to do in demanding and unpredictable conditions.

- Transportation of personnel and tools
- Pulling equipment and material
- Unpredictable snow and terrain

RACING

You are competing on a specific terrain and controlled course:

- Asphalt
- Ice and grass drag
 - Ice oval
 - Snocross
 - Snow and hill drag

Less-used and completely Boondocking in remote areas

MOUNTAIN

You relish any trip that involves high-country open meadows, boondocking in the trees and lots of deep snow.

- Deep powder snow with a light track for maximum traction and flotation
- High-altitude terrain
- Steep slopes

DO MORE WITH TECHNOLOGY

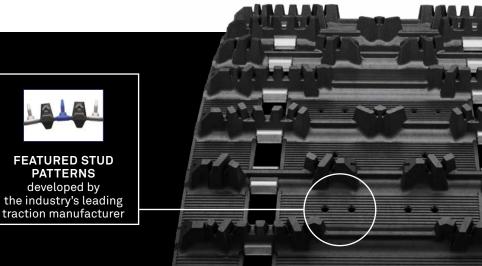

Find this pictogram on the product pages to help you choose the right track for your sled.

Our pre-holed models are a great choice for trail sled applications.

- No drilling necessary, with guick, easy stud installation
- Track belting is enhanced and properly punched for studding
- One-year limited warranty*

* Studs and related hardware are excluded from the Camso limited warranty

Find this pictogram on the product pages to help you choose the right track for your sled.

Find this

pictogram

OPTIMIZED TRACK CONSTRUCTION

Advanced track technology reduces weight and improves performance.

- Lower internal friction means you use less engine power
- Cooler running results in longer track life
- Reduced rolling resistance for improved top speed and fuel economy

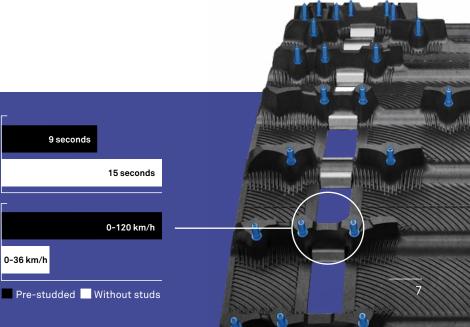

Our factory pre-studded tracks provide enhanced traction and control over tracks without studs as well as convenience and savings compared to conventional studding.

- Better control on icy hills and corners
- Only adds 1lb of weight to the track
- No stud installation or maintenance costs

ENHANCED

TRACTION

TRAILS

On-trail aggressive riders, power riders or cruisers

Tame the trails, no matter what the conditions:

Cruisers seeking smooth handling for big-mile efficiency and touring groomed trails all day long. Aggressive riders who live for the adrenaline rush of top-notch traction that slingshots them around corners and crushes moguls.

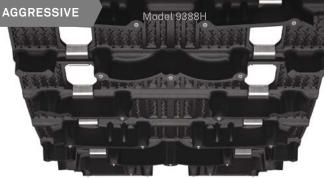

Power riders with a need for speed : pure acceleration across lake, trails and endless straightaways.

TRAIL

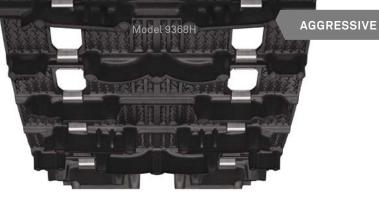

CAMSO ICE Storm 150

Precision and control

With its factory-installed studs, the Camso Ice Storm 150 makes precise turns on icy hills, packed snow and groomed trails, powering you through the most challenging conditions with ease. And Camso's unique two-height lug design offers deep snow flotation with handlebar-gripping acceleration.

- Factory pre-studded for improved traction and control on ice conditions
- 1.25" outer lugs provide power through the tightest turns with ease, maintaining momentum and rider control
- 1.5" cup-shaped centre lugs provide deep snow flotation, and gut wrenching acceleration on packed trails

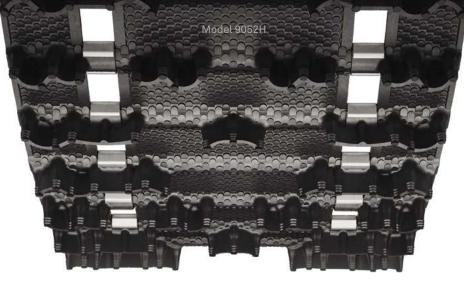

CAMSO Storm 150

Precision and thundering acceleration

For aggressive adrenaline-fueled performance both on and off trail. The Camso Storm 150 is designed for modern rider-forward with a unique two-lug height design. It provides breathtaking acceleration on-trail, excellent flotation off-trail and crisp control under all circumstances.

- 1.25" outer lugs provide power through the tightest turns with ease, maintaining momentum and rider control
- 1.5" cup-shaped centre lugs provide deep snow flotation, and gut wrenching acceleration on packed trails
- Optimized support columns provide the right balance of lug rigidity and flex for performance across the entire power band

AGGRESSIVE

CAMSO RipSaw

Excellent durability and traction

One of the best sellers offered, with rigid, hard-wearing lugs for mile after mile of dependable use. A wide range of sizes fits many different snowmobiles. This is the benchmark model for high-performance trail tracks, with excellent durability and traction on groomed or hard-pack snow.

- Rigid lugs provide superior handling, acceleration, and braking on groomed trails
- Narrow lug base for reduced rolling resistance and maximum top speed
- Angled profiles for aggressive forward and lateral bite

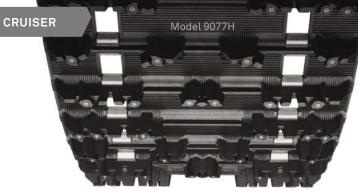

CAMSO **RipSaw II**

All-around performer in all types of snow

Designed for all-around trail performance – excellent traction on both hard-pack and loose, less-compacted snow with ride comfort features.

- Tapered outside lug edges for less side bite when cornering
- Sharp angled lugs for excellent bite on hard-pack snow
- Cupped center and full outer lugs for traction on loose, less-compacted snow
- Lug design generates less noise for improved rider comfort on hard-packed groomed trails

CAMSO **ICE Ripper XT**

Handles and holds

The original factory pre-studded track is a proven performer. With a design that gives riders outstanding handling and stability, it's a true classic.

- Factory pre-studded for improved traction and control
- 1.25" lug height for improved traction and stability
- RipSaw-based attack angled lugs for excellent forward and lateral bite

CAMSO **ICE Attak XT**

Nailed to the trail

A highly aggressive trail model design featuring hundreds of sharp-tip lug studs, giving riders traction and control they can count on.

- Factory pre-studded for improved traction and control
- Lug design delivers better traction than the ICE Ripper XT
- 1.22" lug height provides better handling and stability
- Optimized rubber compound for superior traction on groomed trail

TRAIL

TRAIL

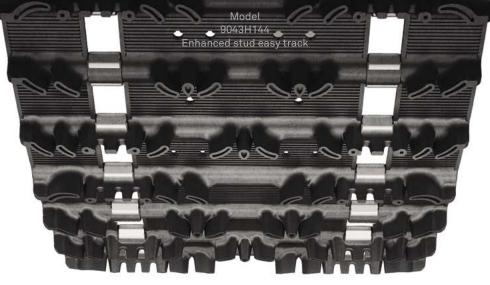

CAMSO **ICE** Attak

Top handling and speed for trail cruising

Popular with trail cruisers, with tried-and-tested sharp-tip studs. An excellent choice for snowmobiles that cannot fit taller tracks, it's designed to deliver outstanding top speed and handling on hard-pack snow.

- Factory pre-studded with aggressive 31-point stud pattern
- HackSaw-based lug design for good top speed and handling on hard-pack snow
- 1.063" lug height for average trail use and efficiency

| MODEL | DIMENSIONS | LUG HEIGHT | WEIGHT | DRIVE PITCH | NB. STUDS | CLIP CONFIG. | |

CROSS-COUNTRY

50/50 and backcountry riders

Boost your crossover or trail sled

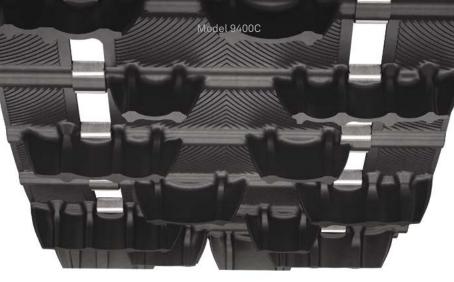

50/50 riders rack up the trail miles, but give them half a chance and they're off the trail, playing in an open, untracked meadow or riding a ditch line.

Backcountry riders don't need any second invitations to head out into untravelled pristine powder and deep snow.

CROSS-COUNTRY

CAMSO Hurricane 175

Dominate deep backcountry

Inspired by mountain track lug geometry, the Hurricane 175 is the perfect balance between deep snow technology and trail-gripping adrenaline. Its 1.75-inch cupped profile design will take you deeper into the backcountry and out again.

- Designed based on mountain tracks, it provides off-trail performance in deep snow while maintaining on-trail agility
- 1.75-inch tall lug profile design reduces vibration, applying more power to the ground both on and off trail
- Optimal column positioning for better track efficiency and enhanced traction in deep-powder snow while ensuring durability in all conditions

CAMSO BackCountry

Make your own path

Recognized as a frontrunner for on/off-trail riding, with a 1.75" lug height. Developed and tested in competitive snocross racing environments, it's designed with traction and durability in mind.

2.52" drive pitch

CAMSO ICE Cobra 1.6

Excellent grip in soft snow

The "Denis Courtemanche Special Edition," in honor of long-time recreational products director who has devoted 50 years to improving snowmobile track design. Factory pre-studded with 1.6" lugs for excellent all-round performance, especially on ungroomed trails.

 Cupped lugs for superior acceleration and braking in loose, soft snow conditions

Flexible lug design for superior off-trail performance

CAMSO Cobra 1.6

Performance, on or off the trail

The Cobra design taken to another level. Excellent performance on the soft, loose snow of ungroomed trails, now available in a 1.6" lug height for even better traction and performance while on/off-trail.

- Cupped lugs for superior acceleration and braking in loose, soft snow conditions
- Flexible lug design for superior off-trail performance
- Designed for factory pre-studded, select lugs are more rigid for traction on hard-packed snow performance

CAMSO Intense

50/50

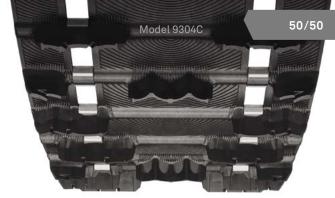

Purely driven by snow

Featuring a 1.5" lug height for on/off-trail riders, this long-time favorite has a proven record of performance and durability. Excellent performer in all types of snow conditions.

- Saw-tooth-tipped lugs provide excellent handling, acceleration, and braking on packed trails
- V-shaped and full lugs for excellent traction in soft. loose snow

CAMSO **RipSaw II 1.5**

All-around on- and off-trail performer

The RipSaw II, known for its versatility in all snow types, is taken to another level. Now boasting a 1.5-inch lug height, it's the track for the most demanding 50/50 rider.

- Sharp angled lugs provide excellent bite on hard-pack snow
- Cupped center and full outer lugs provide traction on loose, less compacted snow
- Tapered outside lug edges offer less side bite when cornering

MOUNTAIN

Deep snow and extreme riders

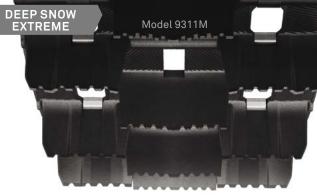

Heading up where few dare to go

Deep snow mountain riders head up where few dare to go, and thrive on exploring the high country's open fields and boondocking through virgin forests.

Deep snow extreme riders push themselves and their sleds to the limit on bottomless powder and the steepest chutes.

WHICH MOUNTAIN TRACK IS RIGHT FOR YOU?

CAMSO Challenger X3.2

Tallest lugs around

Built on the performance of the Challenger X3, the X3.2 features the tallest lugs on the market. With notched lug tips for improved performance, it's one of the most versatile mountain tracks on the market.

- Saw-tooth lug design for improved traction and control on packed snow
- 3" drive pitch and advanced molding technology
- Lug geometry and support columns allow lug cup and flex action for unmatched flotation

CAMSO Challenger X3

Move through mountains

Our tallest lugs on the market. With 3" lugs, this deep snow technical track provides an efficient and light ride for mountain riders craving performance in extreme powder and while boondocking through trees.

- Single-ply construction, 3" drive pitch and advanced molding technology
- Lug geometry and support columns allow lug cup and flex action for unmatched flotation

CAMSO Epic 280

Adventure extreme powder

The Camso Epic 280 sets a new standard in deep snow mountain riding with its unique deep cup-shaped lug design. Its balanced 6-pitch lug sequence provides more track speed in deep powder and excellent floatation on the most challenging conditions. Turn your mountain adventure into an Epic ride.

- floatation and all-out deep snow performance.

 Balanced track profile with a six-pitch lug sequence for optimized track speed, reduced vibration and improved handling in deep snow.

Stiffer columns improve packed snow grip, riding agility and braking.

Deeper cupped lugs drive snow into their centres, extracting traction,

CAMSO Conquer 280

Above and beyond the deep stuff

Made to advance the mountain journey. The Conquer 280 offers a lighter mountain design track providing the ultimate in flotation, traction and performance. Its next generation lug geometry reaches new levels of balance in deep snow.

- Lightweight model increases available HP thanks to less rotating mass
- Lug design requires 20% less rider input on turns and 25% less throttle to hold on side hills

DEEP SNOW Model 9105M

CAMSO **Challenger Extreme** Saw-tooth

Challenge the mountain in all snow types

Stems from the same design as the classic Challenger but adds even higher saw-tooth lugs that, while versatile, make boondocking bottomless powder and climbing the steepest chutes seem easy.

- Rigid proven design for all-around performance and durability
- Saw-tooth lug design feature for grip on trail and wind-blown snow
- Available in a full range of lengths up to 174" to fit all popular snowmobiles

CAMSO **Challenger Extreme** Full cupped

Challenge the mountain in powder snow

Stems from the same design as the classic Challenger but with full-cupped lugs that are especially efficient in powder snow and make boondocking in bottomless powder seem easy.

- Full-cupped and deep V lug design for soft powder snow flotation and traction
- 3" drive pitch available

mduntain

CAMSO **Peak 2.5**

Traction for a variety of applications

Performs across a wide variety of snow conditions with 2.5" angular lugs. Funnels snow under your snowmobile for extra traction and outstanding flotation.

- Angular lugs bite big and funnel snow under snowmobile for outstanding flotation
- Available with soft lugs for powder snow and hard lugs for heavy/wet snow
- Outer lug bars deliver better lateral control for improved handling

CAMSO Cobra WT

High-performance belting to handle heavier loads

soft or loose snow. Ideal for utility snowmobiles used off-trail with high-performance belting to handle heavier loads without track stretching.

- Extra-high 1.5" and 1.8" lugs for the best possible traction
- Cupped lug design ideal in soft, loose snow and for off-trail backcountry exploration
- Lightweight for greater efficiency and improved fuel economy
 Lightweight for greater efficiency and improved fuel economy

CAMSO Cobra SWT

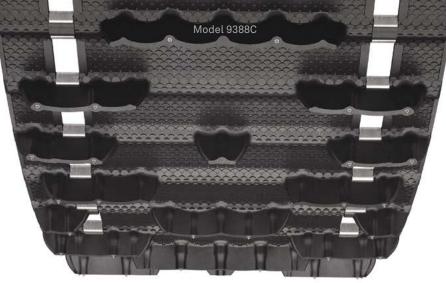

Durable, high-performance design for wide sleds

Wide-track design for performance with traction to spare in deep, The same durable, high-performance design as the Cobra WT, with even wider track for 24" wide applications. For utility users with wide sleds who seek quality.

- Extra tall 1.5" and 1.75" lugs provide optimal traction (1.8" lugs for Cobra WT)
- Cupped lug design ideal in soft, loose snow and for off-trail backcountry exploration

¹ Features four rows drive lugs for improved fitment on select snowmobiles

CAMSO ICE Cobra WT 150

Traction on icy conditions

Based on the high-performance Cobra WT 1.5, the Camso ICE Cobra WT 150 comes with a factory pre-studded design for superior grip in icy conditions. Featuring thinner paddles, it reduces weight while improving traction in soft snow. A lightweight deep snow utility track that's always up to the job.

- off-trail

| MODEL | DIMENSIONS | LUG HEIGHT | WEIGHT | DRIVE PITCH | NB. STUDS | CLIP CONFIG | ì. |

¹ Features four rows drive lugs for improved fitment on select snowmobiles.

UTILITY

 Factory pre-studded for improved traction and control on ice conditions Camso's unique 1.5" cupped-lug design for exceptional performance

Aggressive side profile to increase traction on hard-packed snow

CAMSO **RipSaw Full**

Mile after mile of dependable use

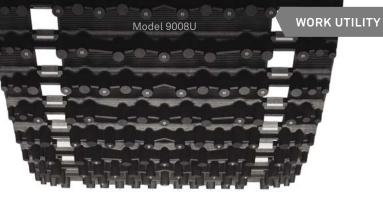

A modified version of the tried-and-tested RipSaw design. Ideal for utility use, it features a full lug design and its 1.25" lug height is a popular upgrade for utility vehicles fitted with 1" lug tracks.

- 1.25" and 1.375" lug heights
- Full block lugs provide traction in soft, loose snow
- Angled lugs for aggressive forward and lateral bite on hard-packed snow

1.25"

(32 mm)

(30 kg)

CAMSO ICE WideTrack

Heavy-duty utility traction

Utility sleds need unbeatable flotation and superb reliability to handle the toughest jobs. Featuring extra lateral stability and traction, this track is the only model in the category with a factory pre-studded design for utility snowmobiles using a 20" wide track.

- Finger lug design for superior traction on hard-pack snow
- 1.25" lug height

2.52" Full

(50 cm x 396 cm) ¹ Features eight rows of internal drive lugs for improved track drive.

20" x 156'

RACING

Riding to win

The speed you need to compete with the best

If you're an asphalt, ice and grass drag, snocross, ice oval or snow and hill drag racer, you need tracks that are optimized for racing on competitive courses. When the crowd roars, you know that adrenaline isn't enough to get you across the finish line first.

9151U¹

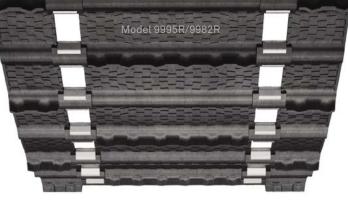

CAMSO Sno X

A whole lot of holeshot

High-performance designs, custom-tailored for snocross competition and tested and proven by professional race teams. Firm lugs and specialty rubber compounds provide the best holeshots, keeping you ahead of the pack.

- 1.75" lugs, the choice of professional racers
- Calculated lug stiffness for best holeshot
- ISR approved for use in mod class

CAMSO Ice Oval Series

The oval racing champion

High-performance design engineered for the extreme cornering and acceleration of oval racing. A favorite among racers, it delivers the performance required from throttle to ice.

- Lightest in class for best efficiency and power transfer
- "Soft" outer rubber compound maximizes traction on ice
- Multiple lug heights for all snow and ice conditions

CAMSO Ice and Grass Drag

Ahead of the pack

Designed specifically for the intense acceleration of drag racing, where the first seconds of the race make the difference between winning and losing.

- Low-resistance 0.525" lugs require less fuel for optimal straight-line acceleration
- 13.5" width available for lightweight and maximum top speed
- Multiple lengths for a wide variety of race chassis

CAMSO **Asphalt Drag**

Made for asphalt drag competitions

- Engineered and built for the unique performance requirements of asphalt drag competitions, where traction and super-fast acceleration are the name of the game.
 - Lightweight 10.625" width for maximum top speed
 - Soft outer rubber provides traction on paved surfaces
- Multiple lengths for a wide variety of race chassis

THE 4 KEYS TO TRACK SELECTION

Length

Is the inside circumference of the track and is calculated as the drive pitch multiplied by the number of track segments. It must be correct to the nearest inch for proper fit without additional modifications to the skid frame.*

How to measure your track length?

| | Drive pitch | Х | Nbr of track segment | = | length |
|------|-------------|---|----------------------|---|---------------------------------|
| Ex.: | 2.52" | Х | 48 | = | 120.96" (track length: 121") |
| | 2.86" | | 48 | = | 137.28" (track length: 137") |

Width

Is the measurement across the track and is governed by the width of the tunnel.

 A slightly narrower track is permissible, like a 15" track in place of a 16" track, but not necessarily the other way around

Drive Pitch**

Is the drive cog center distance around the circumference of the cogs on the drive axle. It must match the existing track or the drive cogs must be changed.

- 2.52" primarily machines manufactured before 2007
- 2.86" especially on recent models manufactured after 2007
- 3" and new 3.5" drive pitch for lowest weight on select mountain sleds

Lug Height***

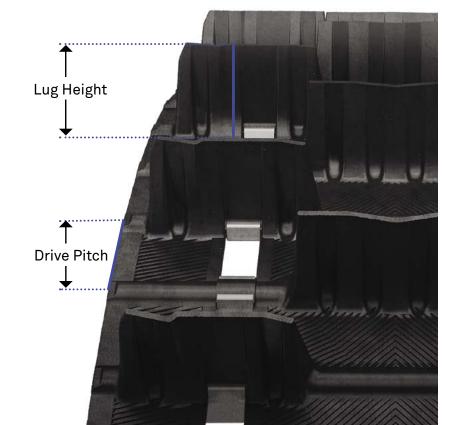

Is the distance the lugs extend above the track surface.

■ 1" - <1.5" – trail

■ 1.5" - <2" – on/off trail

2" and greater – deep snow

Aftermarket parts are available for mods when needed
 ** Some other drive pitches are also found on older models
 *** Check for adequate clearance before going to a taller lug track

Models, specifications, designs or accessories shown or indicated may change or be discontinued without notice. See your local Camso dealer for details, pricing and availability. Only professionals should install the track onto your sled. WARNING: Riding a snowmobile can be dangerous; serious injury, including death, can occur. Read carefully and follow all the instructions in the user manual. Enjoy the off-road safely and responsibly, always wear a helmet and prescribed protective gear and never drink and drive. Some of the images in this brochure are of professional riders under controlled conditions. Do not attempt to replicate. I Copyright © 2020 Camso Inc. All rights reserved.
