

Model 9262C

CAMSO

Cobra 1.6

Performance, on or off the trail

The Cobra design taken to another level. Excellent performance on the soft, loose snow of ungroomed trails, now available in a 1.6" lug height for even better traction and performance while on/off-trail.

- Cupped lugs for superior acceleration and braking in loose, soft snow conditions
- Flexible lug design for superior off-trail performance
- Designed for factory pre-studded, select lugs are more rigid for traction on hard-packed snow performance

MODEL	DIMENSIONS	LUG HEIGHT	WEIGHT	DRIVE PITCH	CLIP CONFIG.
9264C	15" x 137" (38 cm x 348 cm)	1.6" (43 mm)	43 lb. (19.5 kg)	2.86" (73 mm)	Full
