Hurricane 175

Dominate deep backcountry

Inspired by mountain track lug geometry, the Hurricane 175 is the perfect balance between deep snow technology and trail-gripping adrenaline. Its 1.75-inch cupped profile design will take you deeper into the backcountry and out again.

- Designed based on mountain tracks, it provides off-trail performance in deep snow while maintaining on-trail agility
- 1.75-inch tall lug profile design reduces vibration, applying more power to the ground both on and off trail
- Optimal column positioning for better track efficiency and enhanced traction in deep-powder snow while ensuring durability in all conditions
